Non-invasive therapy of wrinkles, lax skin using a novel multisource phase controlled radiofrequency system. Elman M, Vider I, Harth Y, Gottfried V, Shemer A. **Journal of Cosmetic and Laser Therapy**. 2010; 12: 81-86

Radiofrequency technology offers new option for effective, painless skin tightening. Petrou, I. **Cosmetic Dermatology**, June 2010; Vol. 31, No. 6.

Phase controlled, multi-source radio frequency (3DEEP RF) for the treatment of traumatic scars and atrophic acne scars. Fritz, K. Presented at the 19th Annual Scientific Conference of the **European Academy of Dermatology and Venerology**, October, 2010, Gothenburg, Sweden.

Long term anti-wrinkle reduction using a novel multisource of RF phase controlled radiofrequency treatment system. Harth Y, Vider I, Elman M, Shemer A, Gottfried V, Kamin A. **Lasers in Surgery and Medicine**, Volume 42, Issue S22, P. 94-95, (2010). (Presented at the 30th Annual Scientific Conference of the American Society for Laser Medicine and Surgery (ASLMS), April 2010, Phoenix, Arizona, USA).

Novel phase controlled, multi-source radiofrequency system for simultaneous fractional microablation and volumetric dermal heating Harth Y, Lischinsky D, Elman M, Ram R, Gottfried V. **Journal of the American Academy of Dermatology**, Volume 62 • Number 3, AB150, March 2010.

Evaluation of EndyMed PRO multi-source, phase controlled long term reduction of facial wrinkles. Cassuto D, Vider I, Elman M. **IMCAS (International Master Course on Skin Aging)** January 2010, Paris, France.

New era in skin rejuvenation using microfractional RF resurfacing with simultaneous one pulse deep volumetric thermal heating for skin tightening. Harth Y. **IMCAS (International Master Course on Skin Aging)**, January 2010, Paris, France.

Skin rejuvenation using microfractional RF resurfacing with simultaneous one pulse deep volumetric thermal heating for skin tightening. Elman M. **Cosmodern XIV, Joint meeting of the European Society of Cosmetic and Aesthetic Dermatology and the Israel Society for Dermatologic Surgery**, December 2009, Tel Aviv, Israel.

New and unique parallel manipulation of multiple radiofrequency sources for the deeper and safer targeted face and body skin tightening, shaping and contouring. Harth Y. **American Society for Dermatologic Surgery**, October 2009, Phoenix, Arizona.

New and unique parallel manipulation of multiple radiofrequency sources for the deeper and safer targeted face and body skin tightening, shaping and contouring. Harth Y. **IMCAS Asia (International Master Course on Aging Skin)**, July 2009, Bangkok, Thailand.

Use of a manipulated multi-source RF system for the effective and safe skin tightening, contouring and circumference reduction, multi-center clinical results. Elman M, Vider I, Harth Y, Gottfried V, Shemer A. **IMCAS (Asia International Master Course on Aging Skin)**, July 2009, Bangkok, Thailand.

Novel phase-controlled multi-source RF system for the treatment of wrinkles and skin laxity. Elman M., Vider I, Harth Y, Gottfried V., Shemer A. **29th Annual Scientific Conference of the American Society for Laser Medicine and Surgery (ASLMS)**, April 2009, Maryland, USA.

EndyMed™
THE 3DEEP® COMPANY

Physicians Speak Out

"The EndyMed PRO 3DEEP technology uses a new sophisticated way to control RF energy in the tissue. Using the attraction and repulsion forces of multiple RF sources working in tandem it forces energy to the depth of the dermis with minimal heat on the surface. My clinical experience with the EndyMed PRO shows consistent skin tightening especially in the lower face and neck areas with 100% satisfied patients."

Prof. Daniel Cassuto, Professor of Plastic and Reconstructive Surgery at the University of Catania and a private practice in Milan, Italy

"I found the EndyMed PRO a very attractive option for painless skin tightening on the face and body. Its ease of use and lack of consumables makes it a perfect option for long lasting treatment of wrinkles, lax skin and cellulite."

Klaus Fritz, M.D., Board Certified Dermatologist, President of the European Society of Laser Dermatology (ESLD), Head Dermatology and Laser Clinic in Landau, Germany

"In a controlled, multi-center study, we found that 90% and more of patients were very satisfied with the results and that the effects were maintained for six months, proving an active collagen remodeling effect."

Itzhak Vider, M.D., Board Certified Surgeon, Head of Medical OR, Aesthetic Medical Center, Herzliya, Israel

"I have used the EndyMed PRO for face and body skin tightening with several dozens of my patients. The treatment is easy to perform, very pleasant to the patient, very effective with no side effects or post inflammatory hyper pigmentation. We mainly use it for face tightening and lifting, periorbital area and body tightening. I feel that the unique phase controlled, multi-source RF offered by EndyMed enables, for the first time, a powerful skin tightening system that is completely safe and very effective for our Asian population. In my practice, I have found that one session with the EndyMed Pro system for treating wrinkles is more effective than a session with either the Thermage or Ulthera devices."

Preechaphol Mathawanich, M.D., Bangkok, Thailand

About EndyMed PRO

"3DEEP technology enabled us to achieve focused energy in the depth of the tissue with reduced heat and less subsequent damage to the surface of the skin. This results in painless procedures with the need for cooling or topical anesthetics. Now we are able to use, with EndyMed PRO, RF energy more efficiently and effectively."

Flor Mayoral, M.D., Board Certified Dermatologist, Coral Gables, Florida

"I have used the EndyMed PRO system to treat more than 100 patients. The large majority of patients had significant clinical results with very high rates of satisfaction. Both my patients and I witnessed a dramatic lifting effect both on the body and facial areas, with a consistently good improvement in skin texture. A group of my patients that had been treated in the past with first generation RF devices clearly stated that the EndyMed PRO treatment had better results with considerably less pain and downtime."

Hidemi Akai, M.D. PhD, Board Certified Plastic Surgeon, Director - Akai Medical, Clinic, Tokyo, Japan

"I am enthusiastic to work with this new device, EndyMed PRO. My patients are satisfied with the effective improvements and this treatment is easy and not painful!!"

Liliane Mouyal, M.D., Specialist Medical Laser, Paris, France

"What I've been happiest with is the lack of disposables, lack of severe discomfort seen with my Thermage. As one of the busiest Thermage users in the world over the last decade, we have 90-95% converted to EndyMed PRO. The patient results and responses have been excellent to date. I have not had a single patient complaint which was an issue with Thermage."

Roger E. Bassin, M.D., Coral Gables, Florida USA

"Our patients are delighted with the results of the 3DEEP treatment and I have very little difficulty in recommending this safe and effective treatment for skin tightening and facial scarring."

Christopher Inglefield, M.D., BSc FRCS (Plast), London Bridge Plastic Surgery, London, UK
